BARD® MARQUEE®

Disposable Core Biopsy Instrument

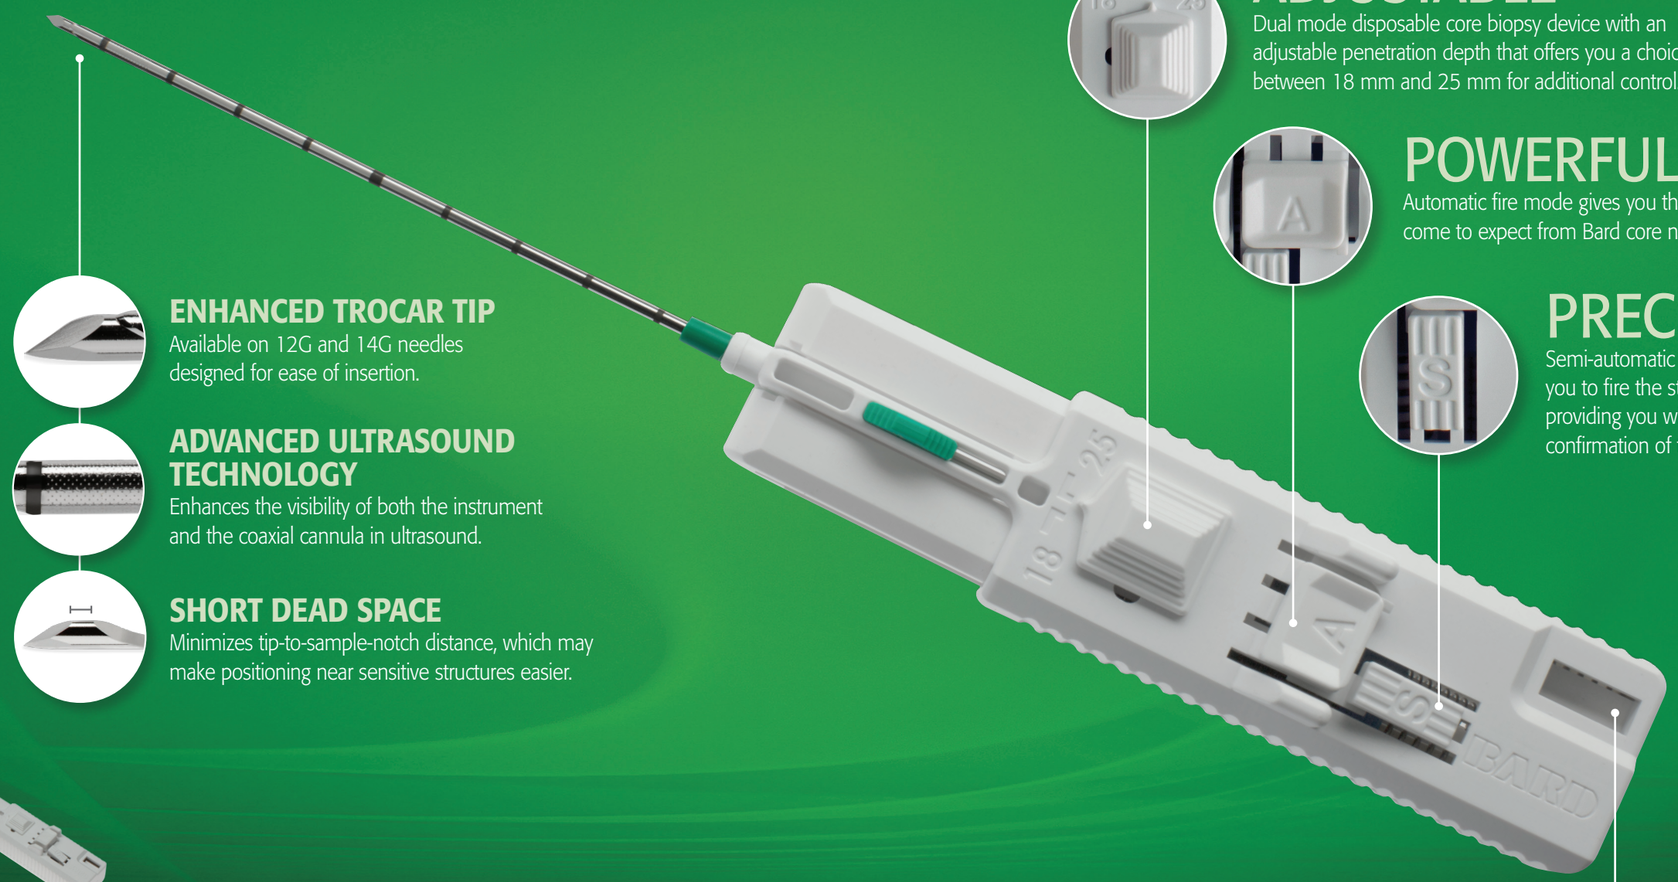
Powerful Choices.
Precisely What You Need.

BARD Biopsy

Unparalleled procedural versatility from a comprehensive core needle.

BARD® MARQUEE®
Disposable Core Biopsy Instrument

With two firing modes and two penetration depth options, the BARD® MARQUEE® Disposable Core Biopsy Instrument gives you powerful choices—precisely what you need to handle a wide range of soft tissue biopsy challenges.



ENHANCED TROCAR TIP
Available on 12G and 14G needles designed for ease of insertion.

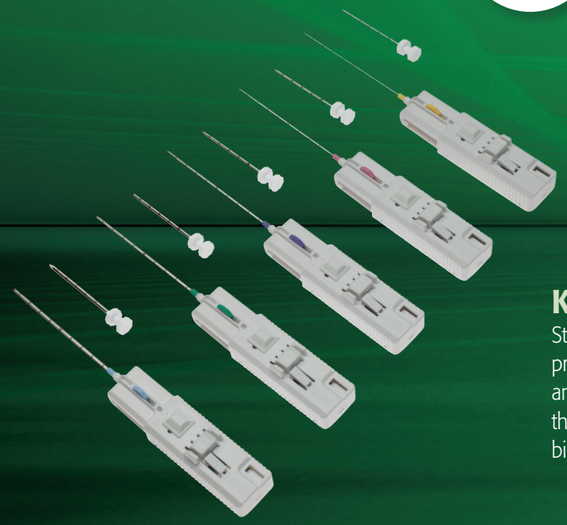
ADVANCED ULTRASOUND TECHNOLOGY
Enhances the visibility of both the instrument and the coaxial cannula in ultrasound.

SHORT DEAD SPACE
Minimizes tip-to-sample-notch distance, which may make positioning near sensitive structures easier.

ADJUSTABLE
Dual mode disposable core biopsy device with an adjustable penetration depth that offers you a choice between 18 mm and 25 mm for additional control.

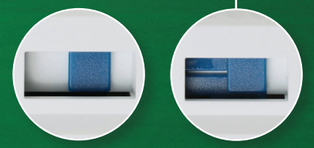
POWERFUL
Automatic fire mode gives you the power you've come to expect from Bard core needles.

PRECISE
Semi-automatic mode enables you to fire the stylet only, providing you with visual confirmation of the sample



KIT OPTION
Streamlines ordering with a single product code for both the biopsy needle and coaxial cannula, as well as ensuring that the coaxial is compatible with the biopsy needle's gauge and length.

FIRE READY INDICATOR
May help reduce the risk of premature instrument firing.



Sample notch exposed

Fully energized

BARD® MARQUEE® Disposable Core Biopsy Instrument

INDICATIONS FOR USE: The BARD® MARQUEE® Disposable Core Biopsy Instrument and Kit are intended for use in obtaining biopsies from soft tissues such as liver, kidney, prostate, spleen, lymph nodes and various soft tissue tumors. It is not intended for use in bone. **CONTRAINDICATIONS:** None known. **WARNINGS:** 1. Good medical judgment should be exercised in considering biopsy on patients who are receiving anticoagulant therapy or who have a bleeding problem. 2. The collection of multiple core biopsy samples may help to ensure the detection of any cancer tissue. A "negative" biopsy in the presence of suspicious radiographic findings does not preclude the presence of carcinoma. 3. The Instrument and Kit have been designed for single use only. 4. Do not resterilize the Instrument or Kit. **PRECAUTIONS:** 1. The Instrument and Kit should be used by a physician who is completely familiar with the indications, contraindications, limitations, typical findings and possible side effects of core needle biopsy, in particular, those relating to the specific tissue being biopsied. 2. The introduction of the needle into the body should be carried out under imaging guidance (ultrasound, X-Ray, CT, etc.). Note: This product has not been tested for MR Imaging compatibility. **POTENTIAL COMPLICATIONS:** Potential complications associated with core biopsy procedures are site specific and may include, but are not limited to: hematoma; hemorrhage; infection; adjacent tissue injury; pain; bleeding; hemoptysis; hemothorax; non-target tissue, organ or vessel perforation; pneumothorax; and air embolism. Air embolism is a rare but serious potential complication of lung biopsy procedures. Rapid deterioration of neurological status and/or cardiac arrhythmia may be indicative of air embolism. Prompt diagnosis and treatment must be considered if the patient exhibits signs or symptoms of air embolism.

Please consult product labels and inserts for complete indications, contraindications, hazards, warnings, precautions and directions for use.
